Opportunity to Highlight Biofilm Researchers

The CBE is continuing the Young Investigator program to encourage the participation of outstanding non-MSU biofilm investigators at its semi-annual Montana Biofilm Science & Technology Meetings.

Targeting postdoctoral researchers and newly hired faculty, up to two investigators will be invited to present research at each Montana Biofilm Meeting, provided a $750 travel reimbursement, and complimentary attendance to the meeting. The next meeting is July 14–16, 2015 in Bozeman, Montana.

Interested young investigators are encouraged to submit abstracts to Paul Sturman, CBE Industrial Coordinator, by April 24, 2015.

Awardees will be chosen by the CBE Executive Committee based on research quality and relevance of the material to the CBE’s mission.

The CBE’s mission is to advance fundamental interdisciplinary research and education related to the management of bacterial biofilms, and to transfer that knowledge to the realm of applied science and technology.

Abstract requirements: Abstracts should be no longer than one (1) page (12-point font) and include presentation title and author names and affiliations.

Email submissions to: Paul_S@biofilm.montana.edu

Upcoming Montana Biofilm Meeting
Bozeman, Montana
July 14–16, 2015

Planned Sessions:
Medical Imaging
Biofilm Fundamentals
Minerals
Updates on Image Analysis, Methods, Microfluidics, and Materials
Oil Field Biofilms
